Re: Trine University/Education One, LLC & Indiana Life Science Academy

Dear Mr. Barber:

As you know, Education One, LLC. is the authorizer of Indiana Life Science Academy (ILSA), a K-8 charter school. The initial charter agreement for this school was granted in 2014, with a term of three years.

I am writing to inform you that on May 16, 2016, the Indiana Life Science Academy School Board voted to close ILSA, effective June 30, 2016. This decision was made after the termination of the school's management company, Imagine Schools Inc.

In the coming weeks, we will work together with members of the school's Board of Directors and school officials to ensure the proper steps are taken to secure student records and help families and students as they navigate school closure. Please look for more information to come regarding our transition plan.

As always, do not hesitate to contact me with any questions you may have.

Sincerely,

Lindsay Omlor
Managing Director
Education One, LLC.
